Double Screens made SILENT space

In Japan, there is a type of lodging called "CAPSULE" hotel. Similar to a stay in a guesthouse, you use a shared space except for your own bed. In your own bed space, you want to block out outside noise and create a relaxing space.

SHY's double screens have made this possible. Surrounded by SHYZIP system and sound insulation fabric was used for the SILENT space.

Impossible? No, make it possible with SHY.
