HEIMTEXTIL

SHY CO., LTD REPORT

We participated in the HEIMTEXTIL exhibition held at the Messe Frankfurt in Germany. (12/01/2023) Borders opened little by little, and it was the first opportunity for our company to participate in an overseas exhibition in a long time. Great opportunity to meet partners and make new encounters.

We felt the potential of fabrics, not only for window screens, but also for furniture and bedding and many more. Sustainability" was a common keyword among the participants. In a world that is constantly changing, sustainable production and behavior will be a constant while the trend will be more and more inclined.

SHY will be exhibiting at R+T2024 next year, cannot wait to see you in person.
