How SHY Roll Screen Was Made

Receive requests from customers. By E-mail, telephone, fax, website, etc.

01
Request

02
Proposal

We will introduce you to the roll screen that suits your request and ask for your detailed wishes.

We will consider how to respond to the customer's wishes and propose it again.

03
Consideration

04
Design

We will consider how to install the roll screen in the drawing. Create new shapes from scratch as needed.

Often iterate the design several times from the proposal.

Once the products is decided to be delivered, we will make a schedule for delivery.

05 Planning

06 Arrangements

Begin to prepare the necessary materials.

We cut cloth, cut long aluminum, fasten screws, etc., to make the customer's products

07 Production

08 Inspection

The completed roll screen is checked for final confirmation according to the inspection items. It will be packed after the inspection passed.

09 Insatllation

Once the product is installed, the roll screen delivery is complete.

SHY Roll Screen Delivery!

What's so amazing about the "SHY Roll Screen"?

Completely black out

Both small and large rooms can be in complete darkness. Even can not see your own hands !

Industry & Sports Center of Tsu City, Saorina

Mie Prefectural Driver's License Center

Amazing fabric that blocks the heat

Ultra-thin aluminum metallized on the back of the fabric. In summer, it reflects sunlight to prevent heat buildup, and in winter, it does not lose heat in the room with the insulation effect!

One of the largest in Japan

SHY is able to make large windows in such a large size that can cover them with a single roll screen !

Oita Prefectural Museum of Art
